

<b>Progressive</b>	<b>Area</b>	<b>Question</b>
<b>1.</b>	<b>Records</b>	
1.1	Company name	Indicate the company name of the economic operator
1.2	Registered office	Indicate registered office of the economic operator
1.3	Operating units	For economic operator based in a foreign / non-EU state, indicate if there are operating units in Italy or in EU countries
1.4	Contacts	Indicate the name and contact details (telephone number, email) of the representative of the economic operator for this consultation phase
<b>2.</b>	<b>Technical and economic capacity</b>	
2.1	Turnover volumes	Indicate, if available due to the seniority of the economic operator, approximate turnover volume in Euro for the supply of rail freight wagons in the last three years 2019-2021
2.2	Production volumes	Indicate, if available due to the length of service of the economic operator, approximate volumes of production of rail freight wagons in the last three-year period (in units) 2019-2021
2.3	Production sites	Indicate the number and location of production sites dedicated to the construction of railway wagons for freight transport
2.4	Current production capacity	Indicate current production capacity by day/week/month/year divided per wagon type.
2.5	Delivery time	Provide an estimate to date of the timing and minimum delivery batches, divided per wagon type.
2.6	After-sales system	Describe the after-sales system and organization implemented by the economic operator
2.7	Supply Chain	Describe the supply processes implemented by the economic operator, with particular reference to sustainability, compliance / quality verification
2.8	Quality certification	Indicate the quality certificates held by the economic operator
<b>3.</b>	<b>Types of product</b>	
3.1	Current lineup	Describe the current lineup of rail freight wagons (types, intended uses, innovative/patented features already implemented)
3.2	Spare parts	Specify for which and how many components - constituting the wagon - you have industrial rights for the supply of spare parts; provide this specification for each type of rolling stock referred to in § 3.1 above.
3.3	Optional	Describe a list of optionals for freight rail wagons currently in the lineup
3.4	Maintenance model	Describe which rules are implemented to draw up the maintenance design justification file, the maintenance description file and a list of "safety-critical components".
3.5	New lineup	Describe any new entries in the lineup already planned
3.6	Innovations	Describe the product/process innovations that the economic operator plans to implement in the period 2022-2031
3.7	Customized solutions	Is the economic operator prepared to consider the possibility of designing and producing taylor-made rail freight wagons on the basis of the specific needs of the client?
3.8	Quotation	Report, relative to the current lineup, an indicative economical quotation distinguished for each product, and independent of the ordered volumes.
